R&D TAX CREDIT

Beer and Brewing

Black Line Group is passionately committed to your success by helping reduce your tax liability. Many companies are unaware the government is offering a generous incentive to those that qualify. The incentive is the Research and Development (R&D) Tax Credit. Black Line Group will facilitate the process to help make your business more competitive, grow faster and be more profitable.

Black Line Group understands your process.

We have the practical hands-on knowledge to understand and uncover all allowable R&D credits. We will not claim a credit we cannot defend. At the conclusion of the study, we provide a robust deliverable detailing the results.

What activities qualify for R&D Tax Credits?

The definition of R&D activities is much broader than most people realize. Brewers and caterers often believe they do not qualify. Examples may include the following:

- Developing recipe formulations for new products
- Developing new or improved fermentation processes
- Developing new or improved brewing or bottling / keg filling equipment
- Improving existing formulations to improve shelf life
- Developing new production process specifications and techniques
- Developing new process for mixing, batching sequences, and temps
- Evaluating / installing new machinery and equipment
- Developing new or improved filtration methodologies
- Developing new or improved water recycling or waste management processes
- Develop small batch to large batch testing validations processes

Focus - Integrity - Collaboration - Delight

We look forward to helping you potentially offset your state and federal tax liabilities with R&D Tax Credits. Let's start with a conversation today.
