R&D TAX CREDIT Food Manufacturing and Catering

Black Line Group is passionately committed to your success by helping reduce your tax liability. Many companies are unaware the government is offering a generous incentive to those that qualify. The incentive is the Research and Development (R&D) Tax Credit. Black Line Group will facilitate the process to help make your business more competitive, grow faster and be more profitable.

Black Line Group understands your process.

We have the practical hands-on knowledge to understand and uncover all allowable R&D credits. We will not claim a credit we cannot defend. At the conclusion of the study, we provide a robust deliverable detailing the results.

What activities qualify for R&D Tax Credits?

The definition of R&D activities is much broader than most people realize. Food producers and caterers often believe they do not qualify. Examples may include the following:

- Developing recipe formulations for new products
- Developing new flavor profiles
- Improving existing formulations to extend shelf life
- Improving existing formulations to achieve specified nutritional requirements
- Developing new production process specifications and techniques
- Developing new process for mixing, batching sequences, and cooking temps
- Evaluating / installing new machinery and equipment
- Developing new packaging designs to provide enhanced or increased shelf life
- Producing prototype samples for testing and validation of new recipes
- Develop small batch to large batch testing validations processes

Focus - Integrity - Collaboration - Delight

We look forward to helping you potentially offset your state and federal tax liabilities with R&D Tax Credits. Let's start with a conversation today.
